Topic: DNA replication, Transcription, Translation and Post transcriptional modification, DNA replication, Diversity of Non Chordates, life cycle of different parasites and diseases caused by them and Integrative Biology.

Resource person: Ayesha Siddiqua, Assistant Professor, Zoology Department, Morigaon College.

Date: 13, 14 and 15th September, 2024

Venue: Seminar Hall, Department of Zoology

The Department of Zoology, Morigaon College invited Miss Ayesha Siddique as a guest faculty for teaching the UG 1st semester, UG 5th semester and PG 3rd semester. Molecular biology was taught to UG 5th semester including the topics DNA replication, Transcription, Translation and Post transcriptional modification. Diversity of Non Chordates was taught to UG 1st semester including the topics general characteristics of Platyhelminthes, life cycle of different parasites and diseases caused by them. Integrative Biology was taught to PG 3rd semester including topics Mapping of genes, atoms and molecules, structure of Amino acids and microbiology. The topics covered under this paper will be further helpful for students in competitive examinations like SLET and CSIR NET. All the students of different semesters were highly benefitted from these lecture sessions. It provided a comprehensive overview of the current state of concerned subjects and offered valuable insights into the future directions of the field

Topic: DNA replication, transcription, translation, post-transcriptional modification, DNA replication, diversity of Non-chordates, life cycle of diff. Parasites and diseases caused by them and Integrative Biology.
Date: 13/11/15th Sept/21

Resource Person: Aysha Siddiqua, Asst Prof Dept of zoology, Muzaffargarh College.

Venue: Seminar hall, Dept of zoology

Signatures:
